Re: Project Grand Slam

Dear Board Members:

Thank you for giving the Rockland County Health Department the opportunity to review the Draft Environmental Impact Statement for the "Project Grand Slam Ball Field" project. We offer the following comments:

#### Section 8 - Infrastructure

In the Sewer Collection and Treatment System portion of Section 8 (pg 34), it is stated that the "pump station has sufficient capacity to convey the flows" and that "capacity will not be an issue". There is no documentation provided in the DEIS to support these claims. The Rockland County Health Department will require a downstream sewer capacity analysis of the 10" trunk line up to and including the pump station referenced in the DEIS.

#### Appendix C - Air Pollution Study

Based on incidences of the particulate standard and the non-attainment status for Rockland, particulate matter should be addressed. The likelihood of an increase in bus traffic should be included in this analysis. With the potential for impact to both the environment and health it would be prudent to have this model evaluated by the experts at NYSDEC and NYSDOH.

Very Truly Yours

Scott McKane, P.E.,  
Senior Public Health Engineer
